FOR PROP FIRMS

Koneth Trader for Prop Firms

Your firm's model. A trading experience customers already understand. Familiar by design. Powerful behind the scenes.

01 / THE CASE FOR CHANGE

Run the business. Not the patchwork.

Growing a prop firm means coordinating the trader experience, infrastructure, accounts, evaluation rules, support, and integrations.

WITHOUT A CONNECTED PLATFORM

More tools. More handoffs.

- Multiple vendors
- Manual rule reviews
- Slower launches
- Inconsistent customer experience

WITH KONETH

One operating layer.

- One connected ecosystem
- Automated pass and violation checks
- 24-48h target onboarding
- Familiar, premium trader experience

THE OUTCOME

Less coordination. More control.

Koneth connects the customer journey to the operational controls behind it.

02 / THE CUSTOMER EXPERIENCE

A better first impression. An easier trading day.

A familiar, light, and easy-to-use workspace with premium graphics, available across web, desktop, iOS, Android, and popular app stores.

- FAMILIAR WORKFLOW
- PREMIUM GRAPHICS
- EASY TO USE
- MULTI-DEVICE

03 / WHY KONETH

Familiar enough to adopt. Flexible enough to grow.

Koneth combines a recognizable trader experience with connected operations, configurable evaluation rules, and a commercial model built around capacity.

01

Familiar + advanced

A recognizable workflow with charts, KAS, and deeper controls.

02

Connected by default

Trader, Server, Console, APIs, and automation in one layer.

03

Rules stay yours

Configure thresholds, pass/fail, notifications, and actions.

04

Capacity-based pricing

Choose the server capacity that fits today; scale by adding servers.

PRICING THAT SCALES WITH YOU

Starter 500 / Business 2,000 / Scale 5,000 / Custom

Pricing follows server capacity and deployment: an activation/licence fee plus annual resources.
Final fees and renewal terms are confirmed in your proposal before commitment.

04 / INFRASTRUCTURE

Use what you trust. Host it your way.

Run Koneth Server on your own VPS or use a dedicated Koneth-provisioned environment. Connect it to the model that fits your operation.

01

External liquidity

Connect your existing liquidity provider.

02

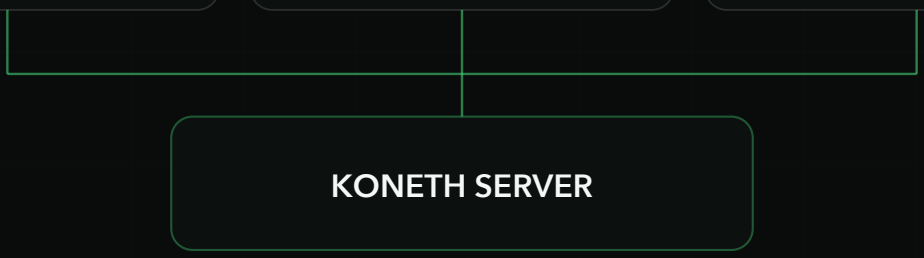

Internal system

Use infrastructure already under your control.

03

Koneth simulation

Use Koneth's managed simulated environment.

KONETH TRADER / WEB, DESKTOP & MOBILE

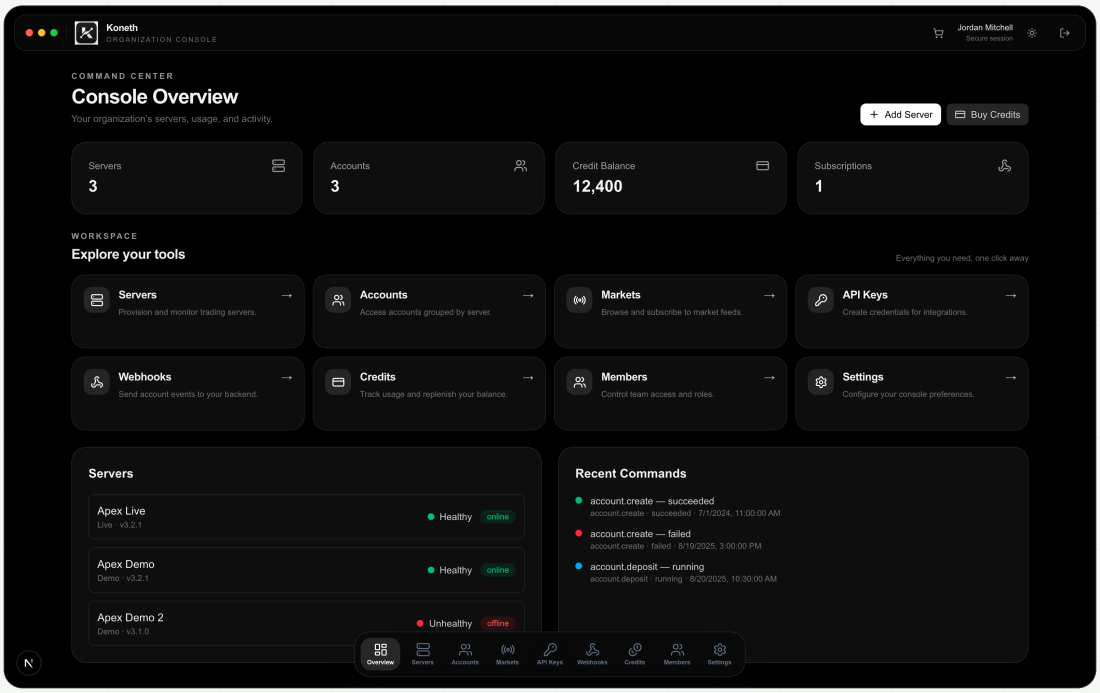

One customer experience. Your infrastructure model.

Hosting model, connection method, and migration scope are agreed during onboarding.

05 / ORGANIZATION CONTROL

Your team sees the whole operation.

Manage servers, accounts, team access, integrations, and rule profiles from one Console, without handing customers across disconnected tools.

01

Day-to-day control

Accounts, servers, and team permissions.

02

Clear handoffs

One view for operations and support.

03

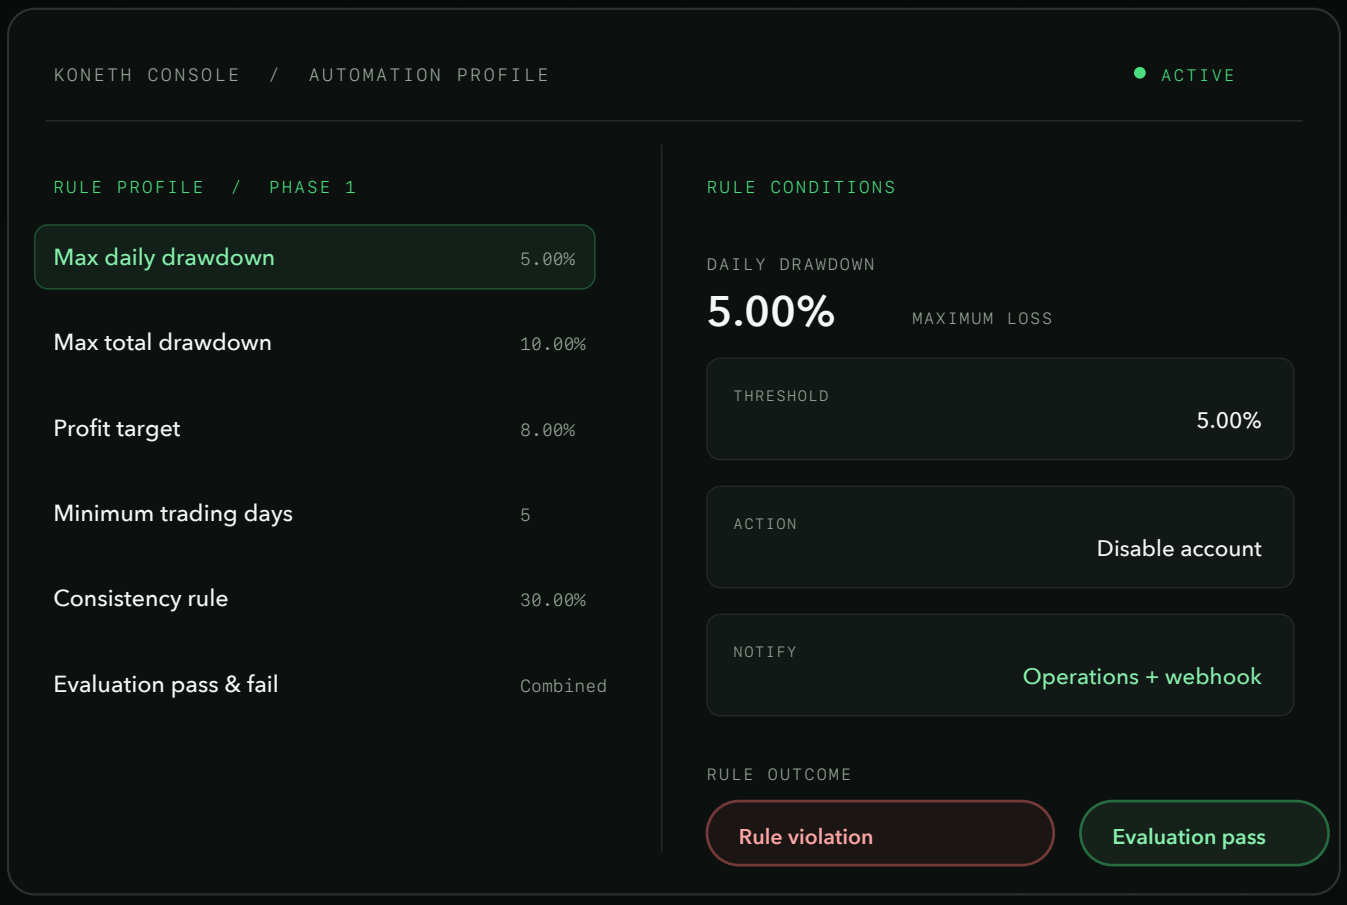

Built to integrate

APIs, webhooks, and existing systems.

06 / YOUR RULES

Keep your rules. Lose the manual work.

Configure thresholds, account actions, and notifications in Console.
Attach each rule profile to your server and let Koneth do the monitoring.

07 / MONITOR & NOTIFY

Know every pass. Catch every violation.

Each triggered rule can notify operations, update evaluation status, and apply the account action your firm selected.

VIOLATION

Daily drawdown reached

Limit: 5.00%

Notify operations
Disable account

PASS

Evaluation complete

Target and minimum days satisfied

Notify operations
Mark account passed

RULE LIBRARY / CONFIGURABLE

01 Max drawdown	02 Daily drawdown	03 Profit target
04 Minimum trading days	05 Consistency rule	06 Account expiry
07 Inactivity	08 Position size limit	09 Open position limit
10 News trading	11 Weekend holding	12 Evaluation pass & fail

Every configured rule leaves a clear result for your operations team.

08 / TRUST & RESILIENCE

Trust is part of the platform.

Security, data handling, hosting, and service commitments are designed to support the way your organization operates.

01

DATA HANDLING

Purpose-limited processing, retention controls, access controls, and secure deletion practices.

02

HOSTING

Own-VPS deployments and dedicated Koneth-provisioned environments, agreed during onboarding.

03

SECURITY

Encryption, authentication, network protections, monitoring, logging, infrastructure isolation, and encrypted backups.

04

UPTIME & SLA

Server status and heartbeat visibility in Console; contractual availability commitments in your Business Agreement or SLA.

GDPR & DATA PROTECTION

Clear controller/processor roles and documented data-subject rights.

International-transfer safeguards apply where required. Privacy: privacy@koneth.com

09 / ONBOARDING

From kickoff to live in 24-48 hours.

A focused onboarding path for standard configurations, beginning once requirements, access, and the deployment model are confirmed.

24-48h

Target implementation time

Custom integrations, migrations, or approvals may extend the timeline.

01

Discover

Goals, hosting, connections, and access.

02

Configure

Server, accounts, branding, and teams.

03

Connect

Rules, APIs, webhooks, and integrations.

04

Validate

Test the journey, then go live.

WHAT WE NEED FROM YOUR TEAM

- **Business & rules**
  Evaluation model, target markets, and decision owners.
- **Technical access**
  Hosting choice, CRM/checkout contacts, and integration scope.
- **Brand assets**
  Logo, naming, and customer-facing preferences.
- **Approval path**
  Named sign-off for go-live and operations handoff.

10 / PROOF & FOUNDATIONS

Proof before promises.

Koneth is a UK-registered technology company building the connected infrastructure behind trading businesses.

> We are building a better way for trading businesses to connect with markets. Koneth is the infrastructure to make that possible.
>
> The Koneth team / Brand commitment

05

customer surfaces

Web, macOS, Windows, iOS, Android

12

rule automations

Risk, evaluation, exposure, lifecycle

03

connection models

External, internal, or Koneth simulation

24-48h

target onboarding

After requirements and access are confirmed

KONETH TECHNOLOGIES LIMITED / ENGLAND & WALES / COMPANY NO. 17527444

11 / BEFORE YOU MOVE

The questions that matter.

Practical answers for teams evaluating platform fit, migration, operations, support, and scale.

01

How much integration is required?

Koneth connects through APIs and webhooks. Start with your current checkout, CRM, or client portal, then agree the scope during discovery.

02

Do we have to replace everything?

No. Koneth is designed to work around existing business systems. Migration is staged and scoped to your operation.

03

Can rules be customized?

Use 12 configurable rule types with thresholds, actions, and notifications. More complex workflows can use APIs and webhooks.

04

Can we scale across servers?

Yes. Start with the capacity you need, then add servers and manage them together from the organization Console.

05

What support is available?

Implementation support is included in onboarding. Ongoing support is available through support@koneth.com and +44 7456 003062.

06

What about uptime and SLA?

Console shows status and heartbeat. Contractual availability and support commitments are documented in the Business Agreement or SLA.

YOUR NEXT MOVE

Let's build your prop firm.

Tell us what you want your customers to experience.
We'll map the platform, rules, connections, and launch path.
